SewerVUE MPIS Float

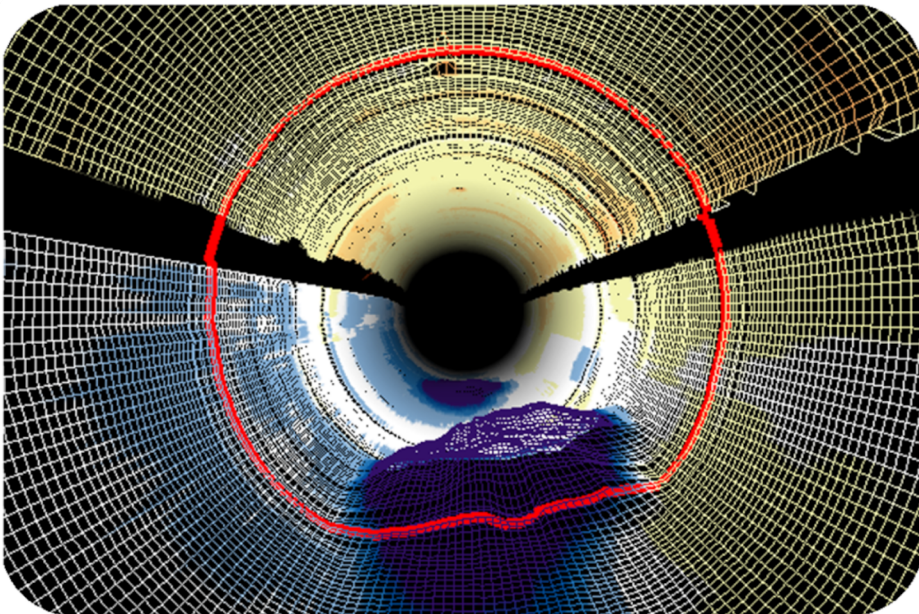

# SewerVUE

IN-PIPE GPR

SewerVUE's long range multi-sensor pipe inspection technology combines state of the art data collection and analysis with proprietary processing and reporting software.

3-D LiDAR, sonar, and FHD-CCTV combine for unparalleled measurements of what's inside your pipe.

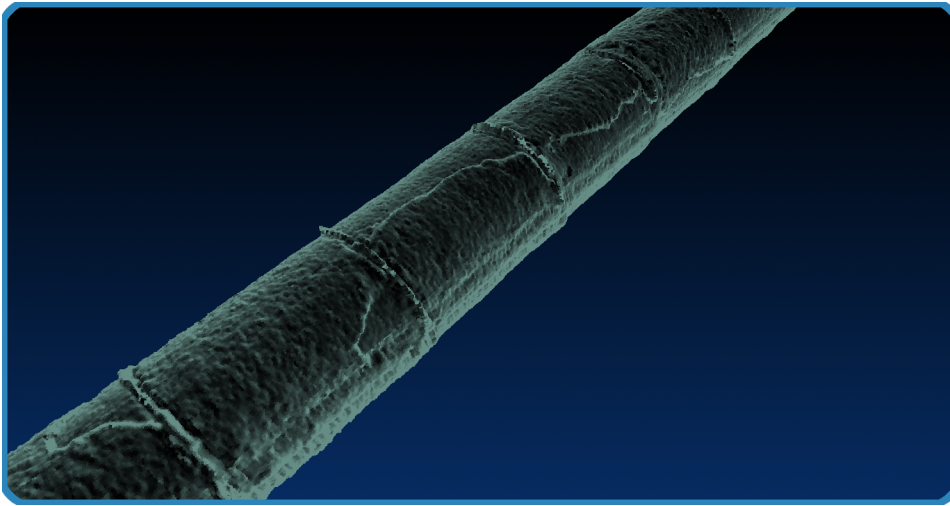

**3,380 ft standard range,  
with the option for more**

**Inspect pipes 16" (400 mm)  
and larger**

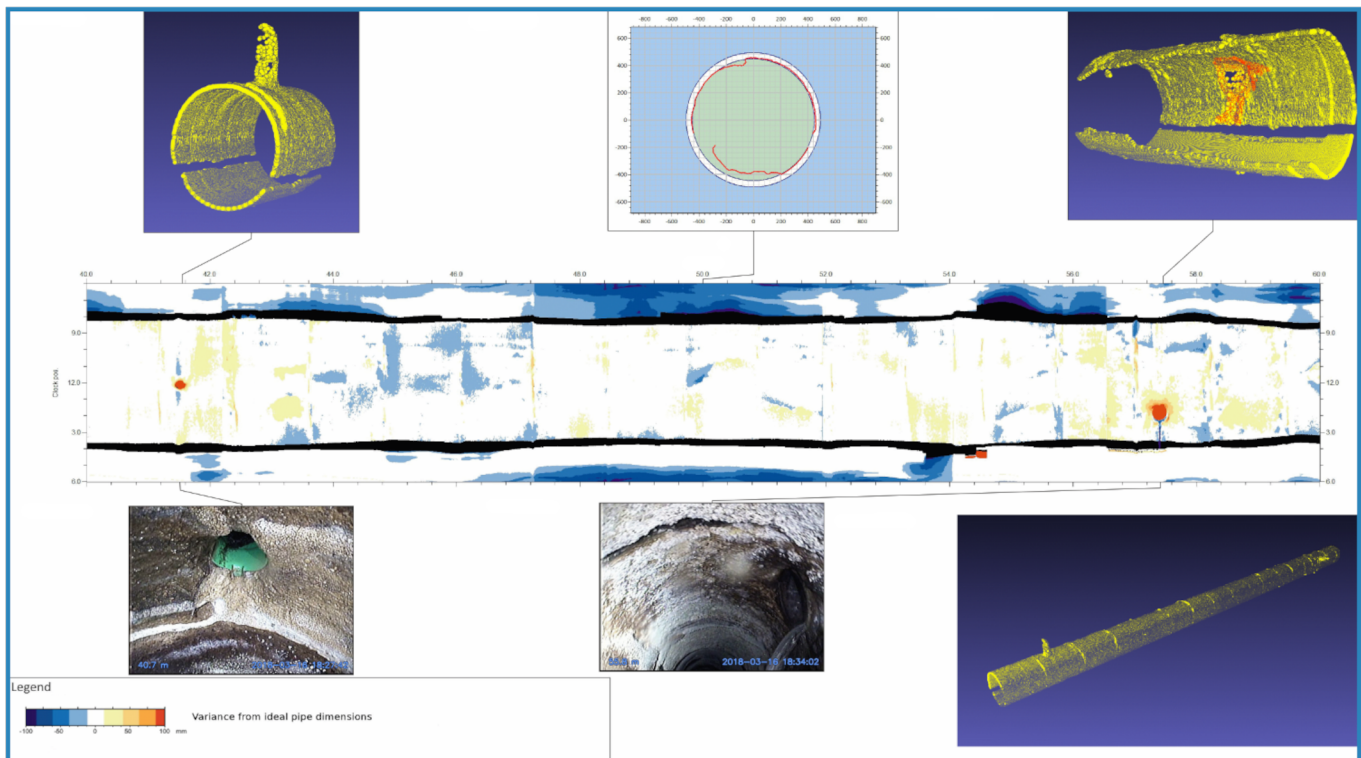

**Deploys through any  
standard 19" manhole**

**No bypass pumping required**

Quantitative and  
actionable data  
with state of the  
art pipeline  
inspection  
technology

Take the guesswork out of wastewater pipe inspection. In a single run, the SewerVUE MPIS Float can collect enough data to tell you the precise size and shape of the pipe, with detailed geometric information about cracks, features, ovality, and more.
